Email Security Solutions - Powered by CBS NoSpam

- Cloud Based Servers reduce traffic to your Mail Servers

- Multi-Location "Clustered" Servers for redundancy

- Reduction in potential Spyware / Malware entering your systems

All the Email Security Features You Need

The innovative CBS NoSpam Email Security solution delivers legitimate email at lightning speed while filtering out virtually 100% of viruses, phishing emails and other malware and the spam it rides in on. This industry-leading performance, which eliminates the false positives that result in inefficiency and costly productivity losses, is in part the result of patented security technology. Content filtering, encryption, email archiving, a killer firewall and other features further ensure your email communications are fully protected 24/7.

Economical - $3 per month (per user)

Zero Administration – Users click to release their own quarantine email.
